## Lightweight and adaptable to most lathes

Designed to fit a wide range of Woodlathes, specially designed to be lightweight for Woodturning, means even small lathes can handle the SuperNova without straining the spindle and

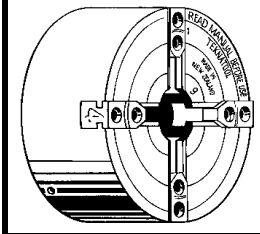

## Unique Pivoting Handle

One handed pivot operation and the unique pivoting handle means greater ease of use and comfort in positioning your work. Less awkward to operate than conventional fixed geared chuck handles - no more running up against work

## Companion Version for Nova Chuck Users

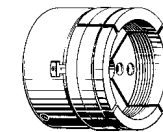

For Nova users who want to upgrade, a Companion version provides all the advantages but

**Ask your Reseller for a copy of the SuperNova Pamphlet and a demonstration today. Your turning deserves the SuperNova advantage!**

## Awesome Gripping Power!

The special Tuff Lock gearing delivers amazing holding power far beyond that of the Nova Chuck. The SuperNova provides the holding power and the stability to turn at the end a delicate goblet with a 1/8" stem to a 29" diameter platter, or a 19" long rough branch!

*Illustration shows the awesome gripping power of the SuperNova, combined with the PowerGrip*
