NOVA VIKING 16" DVR BENCHTOP DRILL PRESS

Leading tool innovator, NOVA is to introduce their latest machine, the Viking 16" DVR Benchtop Drill Press.

The Viking joins the family of DVR machines which includes Voyager 18" DVR Floor Drill Press, the top selling drill press in its class in North America and comes with a multitude of incredible intelligent features that make it safer and easier to use than a conventional drill press. Like the Voyager, the Viking doesn't have belts to cause vibration.

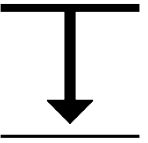

"Don't let it's compact size fool you, this drill press is packed with high end features like a simplified easy to use menu, guiding lasers for alignment and three bright LED lights to illuminate your work. Being a benchtop drill press, this will be appealing to those with limited work space. At an introductory price of just \$949.99. we expect these to be just as popular as the Voyager, if not more with the lower price tag." says Senior VP of Sales, Craig Walls.

Available through all leading NOVA retailers. See website for retailers: teknatool.com

PRESS RELEASE

FOR IMMEDIATE RELEASE

	<p>DIRECT DRIVE POWER AND CONSISTENT TORQUE</p>	<p>Motor delivers correct speed, and power to maintain optimal torque direct to the drill head, across the entire speed range. No belts or pulleys to cause vibration or power loss.</p>
	<p>SMART DIGITAL MOTOR</p>	<p>Smart sensors interacting in a number of ways – safety, intelligence workshop assist, and performance</p>
	<p>BUILT IN LASER AND LIGHT</p>	<p>Quickly locate center position with the cross hairs. Laser stays aligned even when table is moved or tilted, and the DVR low/no vibration performance means laser won't move in operation. Two powerful LED lights to keep your project well lit.</p>
	<p>CAST IRON WOODWORKING TABLE</p>	<p>Maximum flexibility and options for you. Solid Cast Iron for maximum stability. Woodworking design to provide maximum clamping and accessory options. 12 2/3" x 12 2/3" (320mm x 320mm) Tilting and Rotating</p>
	<p>ELECTRONIC VARIABLE SPEED</p>	<p>150 – 3,000 RPM (programmable to 6,000 RPM) Versatile for a variety of projects – Large deep hole drilling, mortising, high speed sanding.</p>
	<p>DISPLAY</p>	<p>Large, easy to read display with choice of units in decimal, fractions and metric. Easy to switch between modes.</p>
	<p>FORWARD AND REVERSE</p>	<p>For LH drill bits, gives the owner more flexibility for projects.</p>
	<p>ELECTRONIC DEPTH STOP</p>	<p>Quickly and accurately automatically stops to the precise depth you program for your project.</p>
